

# Radio Media

**Radio Media exists primarily to provide the technology infrastructure on which radio programmes are created - from studio broadcast/ recording and outside broadcasts, all the way through Radio Main Control (RMC) to broadcasting via Sentech.**

This includes not only staff such as broadcast studio technicians and engineers, broadcast IT specialists who maintain the backbone of broadcasting like Dira!, but also studio technical producers and OB production staff to facilitate all the production elements.

## Audio Fly Away Kit

For recording, broadcast and PA.

## OB Unit

Uses latest broadcast technology and can broadcast over ISDN and IP.

## Music Van

For recording and broadcasting. Uses latest audio technologies. Records on multi track and stereo. Broadcasts on ISDN and IP.

## Broadcasting and Recording Facilities

Radio Media provides broadcasting facilities, fitted with the most advanced equipment, servicing internal and external clients. Radio Media continually engages in the further digitization of the SABC radio stations by sourcing the most up to date equipment for all our radio studios.

### Facilities include:

- World class Music Studios
- Fully fledged Packaging and Drama studios
- Mobile (OB) vans/studios for quick deployment anywhere in South Africa
- Digital playout systems like Dira!
- Regional and International interconnectivity using ISDN, ATM/Fiber Backbone, satellite or 3G routing
- Digital routing of feeds  
Recording, editing and production via ProTools

## Regional Auditoriums for Live Events

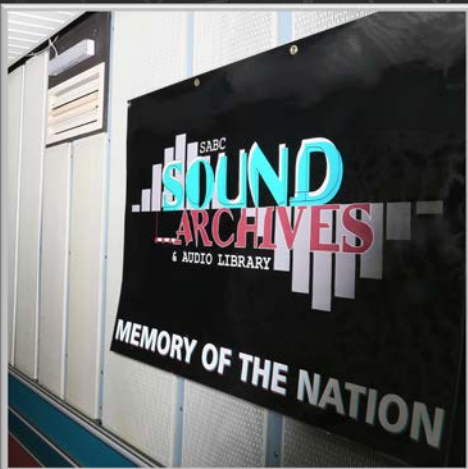

- Live Streaming
- Live music shows and live recordings
- Presentations and Corporate Activations
- Linking to any On-Air facility
- Steinway Model D and Bosendorfer pianos

**Radio Drama Studio**

## Media Libraries

As part of Radio Media provides clients with CD's, archive material plus an Information Library. A Music Library which houses musical instruments and sheet music for clients exists. A transcription and Audio Restoration section revives old transcription LP's and transfers it to CD.
